Executive Summary

Executive Summary

A polished overview of the business and the opportunity

Bean Culture Espresso Bar is presented as a multi-stream specialty coffee opportunity in Mitchell, ACT, combining a customer-facing espresso bar with roasting capability, mobile/event coffee assets, training-room infrastructure and a substantial plant and equipment base. The opportunity is stronger than a standard café listing because the buyer is not simply acquiring a shopfront; they are acquiring an operating platform with brand presence, equipment support, verified revenue inputs, a 360° buyer walkthrough and multiple identifiable growth paths. The current app valuation model indicates an estimated value of \$2.08M, supported by adjusted EBITDA of \$575K and second-hand equipment value of approximately \$695,750. Serious buyers should treat this report as an information memorandum and complete normal due diligence before relying on any figure.

- Specialty coffee espresso bar with roastery, events, training and retail capability
- App valuation estimate: \$2.08M with a blended asking range of \$1.57M – \$2.39M
- Verified revenue sources connected through Xero and Square where available
- Substantial equipment register with app-recorded second-hand values
- 360° walkthrough available with 23 spaces and 54 information pins
- Buyer-facing report can be supported by financials, lease documents and equipment data room access

CH. 02

Business Overview

Business Overview

What the business is, how it operates, and who it serves

The business operates as a specialty coffee company with a retail espresso bar, coffee roasting infrastructure, mobile/event coffee capability and training-related spaces. The model is built around several commercial channels rather than a single café counter: in-store customer trade, roasted coffee supply, mobile coffee carts, training activity, events, retail coffee bags and buyer-visible operational assets. This structure is important for valuation because it creates more ways for a new owner to grow revenue, optimise margins and deploy the equipment base.

Core activity	coffee, hospitality and specialty beverage operations
Location	Mitchell, ACT
Category	Food & Beverage / Hospitality
Current public listing includes 360° bus	
Business is suitable for a buyer seeking

Division Breakdown

Revenue and valuation contribution by business division

The division model is one of the most valuable parts of the report because it separates the business into commercial units. The current app view shows Espresso Bar, Coffee Roastery and Coffee Carts included in the sale bundle, while Web Culture and Keeping are excluded. This helps buyers understand what is actually being valued and prevents unrelated revenue or assets from confusing the sale.

Espresso Bar — Revenue	\$582,124
Coffee Roastery — Revenue	\$534,621
Coffee Carts — Revenue	\$124,035

DIVISION	REVENUE	EBITDA	VALUE
Espresso Bar	\$582,124	\$214,085	\$593,361
Coffee Roastery	\$534,621	\$243,713	\$1,181,883
Coffee Carts	\$124,035	\$96,711	\$306,779

Revenue by Division

Divisions Breakdown Table

Espresso Bar — Revenue	\$582,124
Espresso Bar — Gross Profit	\$214,085
Espresso Bar — EBITDA	\$214,085

Espresso Bar — Valuation	\$593,361
Coffee Roastery — Revenue	\$534,621
Coffee Roastery — Gross Profit	\$243,713
Coffee Roastery — EBITDA	\$243,713

Coffee Carts — Revenue	\$124,035
Coffee Carts — Gross Profit	\$96,711

CH. 06

Assets & Equipment

Plant and Equipment Summary

Asset register overview including estimated second-hand values

The full equipment ledger should not overload the main report. Instead, the report should present a concise plant and equipment summary supported by an exportable register. The current app equipment page shows 61 items with total second-hand equipment value of approximately \$695,750. This is a strong asset-support figure and should be treated as a key valuation support point, subject to buyer inspection and condition verification.

- 61 equipment items recorded in the app
- Current second-hand value shown: \$695,750
- Major categories include coffee equipment, refrigeration, roastery assets, carts and related fitout
- Full equipment register should be available as a due diligence export
- Buyer should verify condition, ownership and finance status

Equipment by Category

Giesen 45 KG Roaster+Bag Packer+Loader		\$400,000
Giesen 15 KG Roaster		\$120,000
Giesen 1.5 KG Roaster		\$70,000
Coffee Van		\$50,000
Coffee Caravan		\$50,000
Sanremo Cafe Racer 3 Group		\$30,000
San Remo Café Racer		\$15,000
		\$15,000

CH. 07

Lease & Premises

Lease and Premises Summary

Lease terms, options, rent, and key conditions

Lease and premises information can materially affect business value. The report should summarise rent, term, options, outgoings, assignment rights, permitted use, security, outdoor areas and any licence conditions. The app lease module currently shows 5 leases analysed with 101 clauses, which should be turned into a buyer-friendly summary rather than a legal dump.

- 5 leases/documents shown in app
- 101 clauses analysed
- Summarise rent, term, options, outgoings and assignment conditions
- Identify any licence agreement or outdoor area terms
- Confirm whether the lease can be assigned to a buyer

Lease Risk Breakdown

CH. 08

Virtual Tour & Property

360° Business Walkthrough

Virtual tour of the business premises and facilities

The 360° business walkthrough is a major differentiator. It allows buyers to inspect the premises, equipment areas and operational spaces before requesting an inspection. The current tour contains 23 spaces, 54 pins and 1 audio narration. This should be promoted as a buyer confidence feature and used to reduce low-quality inspections from people who have not understood the scale of the business.

- 23 tour spaces recorded
- 54 information pins recorded
- 1 audio narration recorded
- Start scene is set in the tour system
- Use the tour to show customer areas, roastery, training room, storage, equipment and back-of-house areas

CH. 09

Growth & Risk

Growth Opportunities

Realistic paths for a new owner to grow revenue or value

Growth opportunities should be realistic, practical and tied to visible assets or existing business channels. For this business, likely growth angles include wholesale expansion, increased event cart bookings, better use of the training room, retail coffee bag growth, online subscriptions, corporate coffee supply, stronger merchandising, private events, and further kitchen/menu development. Each opportunity should state the likely difficulty, timeframe and evidence supporting it.

- Wholesale account growth
- Corporate and private event coffee cart bookings
- Training room course expansion
- Retail coffee bags and subscriptions
- Improved online coffee sales
- Kitchen/menu expansion where operationally viable
- Better use of underutilised spaces identified in the 360 tour

Buyer Engagement Funnel

Next Steps

How a serious buyer should proceed

Interested buyers should review the public listing, complete the 360° walkthrough, submit an enquiry and request access to the locked report sections or due diligence pack. The seller can then qualify the buyer, request an NDA or buyer profile, grant document access, arrange an inspection and proceed to offer discussions. All offers should be subject to normal legal, financial and lease due diligence.

- Complete the 360° walkthrough
- Submit enquiry or request documents
- Seller qualifies buyer and grants access where appropriate
- Review financials, lease and equipment register
- Book an inspection
- Make an offer subject to due diligence
- Proceed to contract only after professional advice
